Dear Parents and Parent Liaisons,

RE: World of Maths incursion for all Year 8's – From the S.T.E.M. Faculty

On Friday 2 September, the exciting and educational *World of Maths* company will be at our school during periods 1 & 2 (9:00-10:30 am) for the whole Year 8 cohort. Venue: STEM labs B102-103.

The aim is to promote problem-solving in Mathematics through the use of hands-on equipment in a fun way.

"World of Maths is a guided discovery lesson. We bring in 17 large activities in each session. The sessions are not designed for all the activities to be completed. The students work in small teams together and walk to any available activity they have not done and start to work through the questions. Some activities will take longer than others."

We look forward to this session.

Mr Louis Diamandikos
Head of S.T.E.M.
